

Submissions listed under the heading “The following is submitted to TCO Development and may be published:” for various criteria in the following chapters.

1. Product and sustainability information

- The total weight of the heaviest product configuration, including power supply and cables (without packaging) in kg.
- The GTINs assigned with the product, either by range or specific id's.

2. Socially responsible manufacturing

- The status (YES/NO), if all factories manufacturing the certified products are category 3, is automatically collected.
- The status (Yes/No & link to public list), if all final assembly factories manufacturing the certified product are listed publicly by the brand owner.

3. Environmentally responsible manufacturing

- The total product weight (including external power supply) and configuration
- The weight of all plastics in the product.
- The weight of all post-consumer recycled plastics and other identified post-consumer recycled material in the product.
- Type of PCF availability must be reported in TCO Certified Portal.
- Instructions on how to retrieve the PCF.
- All verified PCF reduction solutions implemented and the total estimated reduction of the PCF.

4. User health and safety

- The A-weighted sound power level must be reported in TCO Certified Portal.

5. Product performance

- The measured energy values and product configuration must be reported in TCO Certified Portal
- The pixel density, resolution, panel size and aspect ratio must be reported in TCO Certified Portal.

6. Product lifetime extension

- Minimum included product warranty in years
- Minimum purchasable extended warranty in years
- Minimum total available warranty in years (free + extended)
- The maximum cost (in % of product cost) per year for the extended warranty
- A link to a public commitment on warranty covering the certified product
- The drop test, high- and low temperature test results must be reported in TCO Certified Portal.
- The tested number of charging cycles with at least 90% of the rated capacity remaining.
- The toolless battery replacement evaluation must be submitted to TCO Certified Portal.

- The calculated repairability index submitted to TCO Certified Portal
- A link to a public statement where the brand guarantees the availability of these updates.
- The last year, the brand owner publicly committed to delivering such updates.

7. Reduction of hazardous substances

- N/A

8. Material recovery

- Total weight of all packaging materials
- Total weight of all plastic content in the packaging solution
- Total weight of post-consumer recycled plastic materials
- Percentage of post-consumer recycled plastics
